

15KVELBOWS.COM

At 15kVElbows.Com we carry Cooper Power and Thomas & Betts -15kV Elbows used to connect Pad Mounted Electric Utility Distribution Transformers to 15kV Underground Cable.

Make sure you check with your local utility to confirm voltage and wire size compatibility prior to purchasing elbows from us because we have a no return policy due to the incredibly low price we offer our elbows to our customers.

Various quantities of elbows are offered on our Ebay store and we offer quantity discounts to encourage consolidated shipments.
